Ex. 24 20170825 (DEPOSITION OF M JANOSKO) (002).txt  
UNITED STATES DISTRICT COURT  
NORTHERN DISTRICT OF CALIFORNIA  
SAN FRANCISCO DIVISION

WAYMO LLC, )  
 )  
Plaintiff, )  
vs. ) Case No.  
 ) 3:17-cv-00939-WHA  
UBER TECHNOLOGIES INC., )  
OTTOMOTTO LLC; OTTO )  
TRUCKING LLC, )  
 )  
Defendants. )

Videotaped deposition of MICHAEL MURRAY JANOSKO, n  
on behalf of the Defendants Otto Trucking LLC; Uber  
Technologies, Inc., Ottomotto LLC at the Law Offices  
of Quinn Emanuel Urquhart & Sullivan, Level 15, 111  
Elizabeth Street in Sydney, Australia, beginning at  
9.55am and ending at 12.29pm on Friday, 25 August  
2017 before Melissa Hook, Court Reporter of Pacific  
Transcriptions.

00001

1 10.31 SVN server?  
2 A. The administrator of the SVN server.  
3 Q. So does your group have any involvement in the  
4 security protocols for the SVN server?  
5 A. No, we did not have direct involvement.  
6 Q. And you stated earlier you had I think, it was about  
7 20 people working for you. Are any of those  
8 individuals involved in management of the SVN  
9 server?  
10 A. No.  
11 Q. So your security team is primarily focussed on  
12 protecting other aspects of Google's infrastructure,  
13 is that accurate?  
14 A. Correct.  
15 Q. In conferring with Mr Zbrozek, did he - did you  
16 learn how often the credentials for accessing SVN  
17 server are audited?  
18 A. I believe he said monthly.  
19 Q. Do you know if that's at the beginning of the month  
20 or at the end of the month?  
21 A. I don't know.  
22 Q. So do you know if an employee who leaves  
23 on September 1st, would that employee's credentials  
24 remain active until September 30th, if that's when  
25 the auditing occurs?

00019

♀ 1 10.32 A. I don't know.  
2 Q. I believe that you had testified at your deposition  
3 that you had never accessed the SVN server, is that  
4 still accurate?  
5 A. That's correct.  
6 Q. At the time that you were conferring with Mr Zbrozek  
7 about the SVN server, did he show you the process  
8 for accessing the SVN server?  
9 A. Yes, he did.  
10 Q. So you haven't yourself logged in but you got to see

Ex. 24 20170825 (DEPOSITION OF M JANOSKO) (002).txt  
 sort of a demonstration of what that procedure was  
 like?

A. I am not authorised to log in.

Q. Okay. And can you describe for us what you saw as a  
 log-in process?

A. Sure. There's a configuration screen and within  
 that screen you enter the - some details about the  
 connection, the server name, specifying that it's an  
 encrypted connection. I think there is a port  
 number and user name and password.

Q. How did you reach the point where you would provide  
 this information, was it through a web browser?  
 What was the interface that you would, you know,  
 that you'd use in order to access, you know, the  
 screen where you could type in the password and log

00020

♀ 1 10.46 Q. Sure. So your declaration here has several pages  
 2 where you talk about this multilayered Google  
 3 infrastructure, but then you also say that  
 4 Subversion is not on this network?

A. Correct.

Q. Are you aware of at any point Subversion being on  
 the Google network such that it would be protected  
 in the - by the tools that are described in the  
 first - pages 2 to 5 of your declaration?

A. I am not aware of any time when it was internal.

Q. Okay. When we go through some of the aspects of  
 your declaration, so here in paragraph 7 you talk  
 about that "Google has less controls that prohibits  
 untrusted code from executing"?

A. Correct.

Q. What did you mean by that?

A. I mean that we have software that runs and inspects  
 the processes and the services that run on an  
 operating system and match it to a white list of  
 allowed software and blocks execution in instances  
 when it's not a match.

Q. And if it's not a match what happens?

A. It varies by platform, but the user's notified that  
 an application has been blocked.

Q. Okay. And by blocked it means the program cannot

00028

♀ 1 11.49 A. Correct, and showed me the file size, the folder  
 2 size.

Q. Aside from that, you don't know whether that folder  
 actually contained the LiDAR Technology --

MS FOX: Object to form.

Q. --or documents relating to the LiDAR Technology,  
 correct?

A. I gained this information from Sasha who informed me  
 of the type of documents that were in there.

Q. And as the SVN administrator, did he work - do you  
 know whether he worked on LiDAR Technology?

A. I don't know.

Q. Aside from his demonstration, is it accurate to say  
 that he wouldn't be able to look at the 9.7  
 gigabytes of data that was on the server and be able  
 to say this is where the LiDAR Technology was  
 located?

A. I am sorry. Can you repeat the question?

Q. Sure. Basically what I'm trying to get out is the

20 Ex. 24 20170825 (DEPOSITION OF M JANOSKO) (002).txt  
21 information that you provided here in paragraph 24,  
22 that was entirely provided to you by Sasha Zbrozek,  
23 is that correct?

A. Yes.

Q. And you independently would not have been able to  
24 recognise whether something related to LiDAR  
25
